

MarketLens

Campaign Optimization Recommendation Report

EXECUTIVE SUMMARY

MarketLens analyzes campaign spending, revenue, ROAS, ROI and customer acquisition cost to support campaign-level budget optimization.

The dataset contains **20 campaigns** with a total campaign budget of approximately **\$1.63M**, total spend of approximately **\$1.45M**, and total revenue of approximately **\$11.41M**.

The resulting overall ROAS is approximately **7.89**, while overall budget utilization is approximately **88.8%**.

Using the project-defined ROAS recommendation rules:

- **14 campaigns** → Increase Budget
- **4 campaigns** → Maintain Budget
- **2 campaigns** → Review / Reduce

Important: These thresholds are project-defined rules used for this MarketLens analysis. They should not be interpreted as universal marketing benchmarks.

OBJECTIVES

The objective of this report is to analyze campaign-level performance and provide a structured framework for budget optimization.

The analysis uses:

- Campaign Budget
- Campaign Spend
- Revenue
- ROAS
- ROI
- CAC
- Budget Utilization

The recommendations are based primarily on the ROAS thresholds already implemented in the **MarketLens Budget Optimization** dashboard.

RECOMMENDATION LOGIC

Recommendation Criteria:

Campaign recommendations are based primarily on **Return on Ad Spend (ROAS)**. ROAS is used to compare the revenue generated by a campaign with the amount spent on that campaign. The analysis uses project-defined ROAS thresholds to classify campaigns into three recommendation categories.

Recommendation Rules:

ROAS	Recommendation	Interpretation
≥ 3.00	Increase Budget	Campaign meets the project's high-efficiency threshold and can be considered for additional budget.
1.50 – 2.99	Maintain Budget	Campaign falls within the project's middle performance range and should continue with monitoring.
< 1.50	Review / Reduce	Campaign falls below the project's minimum ROAS threshold and should be reviewed for optimization or budget reduction.

Supporting Metrics:

ROAS is not considered independently. ROI, CAC, revenue, customer volume, and budget utilization are also reviewed to provide additional context when evaluating campaign performance.

OVERALL CAMPAIGN PERFORMANCE

Total Budget	Total Spend	Total Revenue	Overall ROAS	Budget Utilization
\$1.63M	\$1.45M	\$11.41M	7.89	88.8%

CAMPAIGN-LEVEL RECOMMENDATIONS

Campaign-level recommendations are based on the project-defined ROAS thresholds. Campaigns with ROAS of 3.00 or above are marked **Increase Budget**, campaigns between 1.50 and 2.99 are marked **Maintain Budget**, and campaigns below 1.50 are marked **Review / Reduce**.

Campaign	Channel	ROAS	ROI	CAC	Recommendation
Google Search Summer Sale	Google Ads	8.53	753.17%	\$118.71	Increase Budget
Meta New Customer Push	Facebook Ads	11.12	1012.33%	\$89.39	Increase Budget
Instagram Product Launch	Instagram	1.65	64.86%	\$202.43	Maintain Budget
YouTube Brand Awareness	YouTube	11.28	1028.49%	\$61.88	Increase Budget
LinkedIn B2B Leads	LinkedIn	0.26	-73.97%	\$3,417.71	Review / Reduce
Email Retention Q3	Email	8.06	705.96%	\$130.96	Increase Budget
Google Display Remarketing	Google Ads	36.79	3,579.39%	\$13.93	Increase Budget
Meta Retargeting	Facebook Ads	9.26	826.43%	\$43.68	Increase Budget

Holiday Shopping Promo	Google Ads	38.08	3,707.62%	\$23.78	Increase Budget
Influencer Awareness	Instagram	3.84	284.07%	\$261.85	Increase Budget
Cart Recovery Email	Email	11.81	1,080.84%	\$45.36	Increase Budget
B2B Webinar Leads	LinkedIn	1.82	81.52%	\$153.21	Maintain Budget
YouTube Product Demo	YouTube	2.64	163.82%	\$431.86	Maintain Budget
Festival Performance Ads	Facebook Ads	2.76	176.16%	\$211.62	Maintain Budget
SEO Content Campaign	Organic Search	3.15	214.83%	\$224.92	Increase Budget
High Value Customer Campaign	Email	1.32	31.91%	\$784.22	Review / Reduce
Mobile App Acquisition	Google Ads	13.09	1,209.39%	\$66.38	Increase Budget
Social Video Conversion	Instagram	4.73	373.48%	\$196.40	Increase Budget
Enterprise ABM	LinkedIn	10.36	936.26%	\$37.95	Increase Budget
Year End Mega Sale	Google Ads	4.18	317.82%	\$175.26	Increase Budget

CAMPAIGNS REQUIRING REVIEW / REDUCTION

The following campaigns fall below the project-defined ROAS threshold of 1.50 and are therefore flagged for review or budget reduction.

Campaign	ROAS	Recommendation
LinkedIn B2B Leads	0.26	Review / Reduce
High Value Customer Campaign	1.32	Review / Reduce

HIGH-PERFORMING CAMPAIGNS

The following campaigns meet or exceed the project-defined ROAS threshold of 3.00. These campaigns demonstrate strong revenue generation relative to campaign spend and are identified for potential budget expansion.

Campaign	Channel	ROAS	ROI	CAC
Google Search Summer Sale	Google Ads	8.53	753.17%	\$118.71
Meta New Customer Push	Facebook Ads	11.12	1,012.33%	\$89.39
YouTube Brand Awareness	YouTube	11.28	1,028.49%	\$61.88
Email Retention Q3	Email	8.06	705.96%	\$130.96

Google Display Remarketing	Google Ads	36.79	3,579.39%	\$13.93
Meta Retargeting	Facebook Ads	9.26	826.43%	\$43.68
Holiday Shopping Promo	Google Ads	38.08	3,707.62%	\$23.78
Influencer Awareness	Instagram	3.84	284.07%	\$261.85
Cart Recovery Email	Email	11.81	1,080.84%	\$45.36
SEO Content Campaign	Organic Search	3.15	214.83%	\$224.92
Mobile App Acquisition	Google Ads	13.09	1,209.39%	\$66.38
Social Video Conversion	Instagram	4.73	373.48%	\$196.40
Enterprise ABM	LinkedIn	10.36	936.26%	\$37.95
Year End Mega Sale	Google Ads	4.18	317.82%	\$175.26

MAINTAIN-BUDGET CAMPAIGNS

These campaigns fall within the project-defined ROAS range of 1.50 to 2.99. The recommendation is to maintain the current budget while monitoring performance and conversion efficiency.

Campaign	Channel	ROAS	ROI	CAC	Recommendation
Instagram Product Launch	Instagram	1.65	64.86%	\$202.43	Maintain Budget
B2B Webinar Leads	LinkedIn	1.82	81.52%	\$153.21	Maintain Budget
YouTube Product Demo	YouTube	2.64	163.82%	\$431.86	Maintain Budget
Festival Performance Ads	Facebook Ads	2.76	176.16%	\$211.62	Maintain Budget

KEY METRICS USED

The following metrics are used to evaluate campaign efficiency, revenue performance, customer acquisition cost, and budget utilization.

Metric	Formula	Purpose
ROAS	Revenue ÷ Spend	Measures revenue generated for each unit of advertising spend.
ROI	(Revenue – Spend) ÷ Spend × 100	Measures return generated relative to campaign spend.
CAC	Spend ÷ Customers	Measures the average cost of acquiring one customer.

Budget Utilization	$\text{Spend} \div \text{Budget} \times 100$	Measures the percentage of allocated budget that has been spent.
Payback Period	$\text{Spend} \div (\text{Revenue} \div 30)$	Provides an estimated number of days to recover campaign spend using a 30-day revenue assumption.

Payback Period Assumption: The payback period is an estimated project metric calculated using a 30-day revenue period. It should not be interpreted as a cohort-based cash-flow payback period.

BUDGET UTILIZATION

Overall campaign budget utilization was 88.8%, with approximately \$1.45M of the total \$1.63M allocated budget spent during the campaign period.

Metric	Value
Total Budget	\$1.63M
Total Spend	\$1.45M
Budget Utilization	88.8%
Unspent Budget	\$183,077

The 88.8% utilization rate indicates that most of the allocated campaign budget was deployed during the analyzed period. The remaining budget represents approximately \$183K of unspent allocation. Budget decisions should be considered alongside campaign-level ROAS, CAC, and ROI rather than utilization alone.

Small methodology note

Calculation: Budget Utilization = Total Spend ÷ Total Budget × 100.

DATA & METHODOLOGY

MarketLens combines campaign performance, customer and lead, marketing event, and customer journey data to evaluate campaign performance, funnel conversion, attribution, and budget efficiency.

Data Source	Key Information
Campaign Performance	Budget, Spend, Impressions, Clicks, Leads, Qualified Leads, Customers and Revenue
Leads & Customers	Campaign, Channel, Lead Date, Conversion Date, Geography, Device, Age Group, Status and Revenue
Marketing Events	Impressions, Clicks, Leads, Qualified Leads and Customer events
Customer Journeys	First-touch, second-touch, third-touch, last-touch and conversion information

The analysis follows a structured workflow covering data preparation, campaign performance analysis, funnel analysis, attribution analysis, ROI measurement, and budget optimization.

1. Data Preparation

Data was cleaned, standardized and prepared for analysis.

2. Campaign Performance Analysis

Campaign spend, revenue, customers, ROAS, ROI and CAC were analyzed.

3. Funnel Analysis

The customer journey was analyzed from impressions through clicks, leads, qualified leads and customers.

4. Attribution Analysis

First-touch, last-touch and weighted attribution approaches were compared.

5. Budget Optimization

Campaigns were classified using the project-defined ROAS thresholds.

Tools: Python/Pandas, SQL/MySQL, Power BI and Excel/CSV.

UTM DATA LIMITATION

The current MarketLens dataset does not contain dedicated UTM fields such as UTM Source, UTM Medium, UTM Campaign, UTM Content, or UTM Term. Therefore, direct UTM mapping and UTM-level performance analysis could not be performed using the available data.

Expected UTM Field	Availability	Alternative Used
UTM Source	Not available	Channel
UTM Medium	Not available	Channel / Campaign Type
UTM Campaign	Not available	Campaign_ID / Campaign_Name
UTM Content	Not available	Not available
UTM Term	Not available	Not available

For the current analysis, Campaign_ID, Campaign_Name, Channel, and Campaign_Type were used as the primary campaign classification fields. This provides campaign-level analysis but does not replace detailed UTM tracking.

BUSINESS RECOMMENDATION FRAMEWORK

The recommendation framework uses campaign ROAS as the primary classification metric, supported by ROI, CAC, revenue, and budget utilization. The framework is based on the project-defined thresholds used in the MarketLens analysis.

Recommendation Rules

ROAS Range	Recommendation	Action
≥ 3.00	Increase Budget	Consider increasing budget while monitoring efficiency.

1.50–2.99	Maintain Budget	Maintain current allocation and monitor performance.
< 1.50	Review / Reduce	Review campaign performance and consider reducing allocation.

Supporting Metrics

ROAS should not be considered in isolation. ROI, CAC, revenue contribution, customer volume, and budget utilization should also be reviewed before making campaign-level budget decisions.

- **ROAS** — evaluates revenue generated relative to spend.
- **ROI** — evaluates return relative to campaign investment.
- **CAC** — evaluates customer acquisition cost.
- **Revenue** — measures the campaign's generated revenue.
- **Budget Utilization** — shows how much of the allocated budget has been spent.

Budget Decision Process

- **Step 1 — Identify campaign ROAS**
Review the campaign's ROAS against the project thresholds.
- **Step 2 — Review supporting metrics**
Check ROI, CAC, revenue and customer volume.
- **Step 3 — Apply recommendation category**
Classify the campaign as Increase Budget, Maintain Budget, or Review / Reduce.
- **Step 4 — Monitor after changes**
Track subsequent campaign performance before making additional budget changes.

CONCLUSION

The MarketLens analysis provides a consolidated view of campaign performance, funnel efficiency, attribution, return on investment, customer acquisition cost, and budget utilization.

Across the analyzed campaigns, the total allocated budget was **\$1.63M**, with **\$1.45M** spent and **\$11.41M** in revenue generated. The overall ROAS was **7.89**, while budget utilization reached **88.8%**.

Campaign-level analysis identified different performance categories using the project's defined ROAS thresholds.

The analysis also highlights the importance of combining ROAS with supporting metrics such as ROI, CAC, revenue, customer volume, and budget utilization when evaluating campaign performance.

Future improvements can include standardized UTM tracking, more detailed attribution data, and continued monitoring of campaign performance over time.

Key Takeaway

MarketLens provides a structured framework for evaluating campaign performance and supporting data-driven budget allocation using campaign efficiency and business performance metrics.
